Our winning formula for
medical cannabis

Complex requirements for medical cannabis

The pharmaceutically safe and economic cultivation of medical cannabis is a challenging task.

Alongside the spatial and climatic conditions, in particular the planning and organisational preparatory work are of great importance.

Simple solutions and excellent references

Weiss Technik is a specialist in clean room and climate solutions and offers reliable complete solutions as a general contractor.

Our range of services covers planning and implementation in accordance with tenders as well as the reliable system operation.

Weiss Technik has a large portfolio of proven standard solutions, which can be expanded or individually adapted as required.

Thanks to many years' experience of large projects, Weiss Technik has excellent references from the cultivation, medical technology and pharmaceutical sectors.

Our solutions for medical cannabis from a single source

Benefit from our comprehensive range of services and ensure your additional yield.

Safe planning

We are specialists in successful large projects. All services come from a single source and all interfaces are optimally tailored to each other.

- Team player with industry experience
- Planning of growth rooms and technical equipment
- Support with public authorities
- Qualification of the solution

GMP compliant drying

Our drying solutions ensure the climatic conditions required in the various drying stages and therefore the desired product quality.

- Exactly controlled moisture
- Precisely set temperature
- GMP compliant monitoring

Safe storage

Our air-conditioning systems meet the storage standards required by the German Cannabis Agency.

- Exactly controlled moisture
- Precisely set temperature
- Protection against mould and fungus
- Control and monitoring in accordance with GMP

Large network

Our optimally attuned service team is not outsourced.

- 24/7 service (optional)
- Large store of spare parts
- Performance of requalification

GACP compliant and high-yield

Our propagation and growth rooms provide uniform growing conditions. The ventilation design ensures particularly high yields with consistent plant qualities.

- Tried and tested cultivation equipment
- Smart air-conditioning
- GACP compliant conditions
- Plannable high yields

Pharmaceutical processing

We offer a large portfolio of cleanroom solutions for the processing inclusive packaging and repacking of medical cannabis.

- GMP compliant cleanroom solution
- Integrated monitoring system
- Work stations, sluices

Storage of retained samples

Our stability testing systems for retained samples are specially tailored to the requirements of the pharmaceutical industry.

- Extremely precise settings for temperature and air humidity
- Meets the requirements of the ICH Q1A guideline
- GMP compliant monitoring
