

Our standards:
Simple. Reliable. Fast.

Temperature and Climate Test Chambers for electronic components and modules.

The future is becoming increasingly digital. And the demands on the function, safety and service life of your products are constantly increasing. Whether it be for sensors, batteries or entire electronic assemblies - with our innovative Temperature and Climate Test Chambers, you can simulate the influence of temperature and humidity on your products and guarantee their longevity with accelerated, reproducible and certified testing.
Simply set up and go!

Test us!

We guarantee:

- Fast availability of ideal test chambers
- Attractive prices
- Quality and sustainable design
- Professional support
- Flexible modifications for special requirements
- Best in service

Great technology. Great reasons.

Savings to be had

weisstechnik offers you innovative, high-quality and reliable Temperature and Climate Test Chambers at competitive prices. So, if you want to buy, or even hire, we'll make you an attractive offer.

Future-proof as standard

- Compliant with all testing standards
- Modular solutions for many testing scenarios
- Pre-configured up to EUCAR-Hazard-Level 5
- Integrated ESD protection

Fast, faster, weisstechnik

- Prompt quotation with extensive technical description
- Speedy delivery of many chambers from stock and short delivery times for chambers with standard options

Adaptation to any testing scenario

- Modifications straight from the factory, if more than the standard configuration is required
- Full, ongoing support from application experts

On the safe side - round the clock

- In-built diagnostics and inspection systems reduce maintenance and repair times
- Professional maintenance, calibration and upgrades
- Largest service network in Germany with quick response times

Great for the climate

- Extremely durable devices that can be maintained for decades
- Use of **greenmode®** for low energy consumption
- New environmentally and service-friendly refrigerants with very low GWP value

Unlimited testing. Test chambers for all your needs.

Our range of devices and systems for environmental simulation is vast. No matter whether temperature, climate, vibration, corrosion, emission, altitude, pressure or combined stress testing, we have the right solution in all sizes for you. From standard versions to bespoke, fully integrated systems. The choice is yours - for consistent reproducibility and precise test results.
